

 Nord Modules™

# TM150

Top Mover

# TM150

Nord Modules produces standard modules in industrial quality for automated productions. The TM150 enables the mobile robots MiR100 and MiR200 to pick up & deliver objects to our gates, and from there, transport them to e.g. a conveyer belt. The TM150 with a lifting function is placed above the mobile robot. With its specially designed slats it can merge with our gate modules, connecting the mobile robot with production lines and storage systems.

## Your key benefits

- Safe and reliable transportation of objects - designed according to international safety standards
- Cost-efficient delivery of payloads up to 153 kg / 337 lbs
- Touch screen with user-friendly interface to easily add customer-specific functions and programs
- Rubber-lined aluminum slats, making sure that the object is always placed securely on the TM150
- Flexible standard product designed to simply adjust to specialised work processes
- Simply set up and running within a few days - providing a complete solution with our gates
